

## 8.EE Ant and Elephant

An ant has a mass of approximately  $4 \times 10^{-3}$  grams and an elephant has a mass of approximately 8 metric tons.

- a. How many ants does it take to have the same mass as an elephant?
- b. An ant is  $10^{-1}$  cm long. If you put all these ants from your answer to part (a) in a line (front to back), how long would the line be? Find two cities in the United States that are a similar distance apart to illustrate this length.

Note: 1 kg = 1000 grams, 1 metric ton = 1000 kg, 1m = 100 cm, 1km = 1000 m
