

LEARNING OBJECTIVE: We will determine the decimal approximation of certain irrational numbers and compare irrational numbers. (Lesson 74)

CONCEPT DEVELOPMENT:

Irrational Numbers: Numbers that have infinite decimal expansions and DO NOT have repeating block of digits.

Example: $\sqrt{3}, \sqrt{22}$

Non-Example: $\frac{5}{3}, \sqrt{12.25}$

Using Rational Approximation to Get the Decimal Expansion of Square Roots

Rational approximation uses a sequence of rational numbers to get closer and closer to a given number to estimate the value of the number.

- Begin by determining the integers that the square root lies between.
- Then determine which interval of tenths that the number belongs.
- Then determine which interval of hundredths the number belongs.

We can use rational approximation to compare irrational numbers

Example: Which number is greater: $\sqrt{65}$ or $\frac{89}{11}$?

$(\sqrt{64})^2$	$(\sqrt{65})^2$	$(\sqrt{81})^2$	
8^2	65	9^2	
8^2	$(\sqrt{65})^2$	$(8.1)^2$	$\begin{array}{r} 8.1 \\ \times 8.1 \\ \hline 81 \\ 6490 \\ \hline 65.61 \end{array}$
64	65	65.61	
$(8.06)^2$	$(\sqrt{65})^2$	$(8.07)^2$	$\begin{array}{r} 8.06 \\ \times 8.06 \\ \hline 64.9636 \end{array}$
<u>64.9636</u>	65	65.1249	

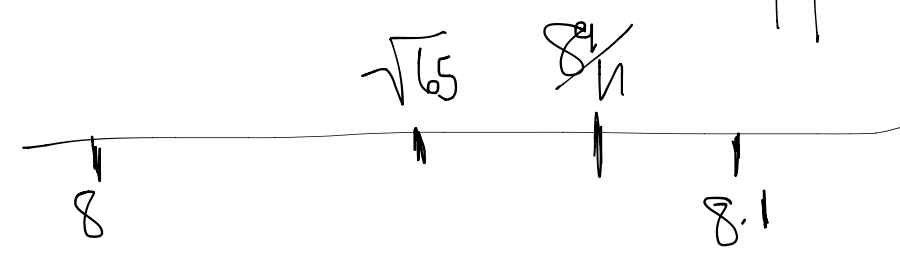

$\sqrt{65} \approx 8.06$

$\frac{89}{11} = 8\frac{1}{11} = 8.0909$

$\begin{array}{r} 11 \overline{) 100} \\ 89 \\ \hline 110 \\ 99 \\ \hline 100 \end{array}$

8.09

$\frac{89}{11} > \sqrt{65}$

GUIDED PRACTICE:

Steps to Finding the Values of Square Roots

1. Determine which two integers the square root is between.
2. Use rational approximation to determine which interval of tenths the number falls between.
3. Use rational approximation to determine which interval of hundredths the number falls between.
4. If necessary make the requested comparison.

$\sqrt{17} \approx 4.12$

Estimate the value of $\sqrt{28}$ to the nearest hundredth.

$(\sqrt{25})^2$ $(\sqrt{28})^2$ $(\sqrt{36})^2$
 5^2 28 6^2
 $(5.2)^2$ $(\sqrt{28})^2$ $(5.3)^2$ $\begin{matrix} 5.3 \\ \times 5.3 \\ \hline 28.09 \end{matrix}$
 27.04 28 28.09
 $(5.29)^2$ $(\sqrt{28})^2$ $(5.3)^2$
 27.9841
 $\sqrt{28} \approx 5.29$

$\begin{matrix} 5.29 \\ \times 5.29 \\ \hline \end{matrix}$

Estimate the value of $\sqrt{17}$ to the nearest hundredth.

$(\sqrt{16})^2$ $(\sqrt{17})^2$ $(\sqrt{25})^2$
 4^2 17 5^2
 $(4.1)^2$ $(\sqrt{17})^2$ $(4.2)^2$ $\begin{matrix} (4.3)^2 \\ 18.49 \\ \hline \end{matrix}$
 16.81 17 17.64 $(4.2)^2 = 17.64$
 $(4.12)^2$ $(\sqrt{17})^2$ $(4.13)^2$
 16.9744 17 17.0569

$\sqrt{17} \approx 4.12$

Estimate the value of $\sqrt{91}$ to the nearest hundredth.

Estimate the value of $\sqrt{78}$ to the nearest hundredth.

NAME: _____

Math 7.2, Period _____

Mr. Rogove

Date: _____

<p>Which is greater, $\sqrt{50}$ or $\frac{319}{45}$?</p> <p> $(\sqrt{49})^2$ $(\sqrt{50})^2$ $(\sqrt{64})^2$ 7^2 50 8^2 $(7.0)^2$ $(\sqrt{50})^2$ $(7.1)^2$ 49 50 50.41 $(7.07)^2$ $(7.08)^2$ 49.9849 50.1264 </p> <p>$\sqrt{50} \approx 7.07$</p> <p>$\frac{319}{45} > \sqrt{50}$</p>	<p>Which is greater, $\sqrt{59}$ or $\frac{253}{33}$?</p> <p> $\frac{45}{\times 7}$ $\frac{315}{\text{---}}$ $45 \overline{) 4.0000}$ $\underline{360}$ 400 $\underline{360}$ 40 </p>
---	--

Place the following on a number line:

$(\sqrt{38}, \sqrt{43}, \sqrt{47}, \frac{20}{3}, 6.\overline{15}, \frac{53}{8})$

WORK!

Mr. Rogove

Date: _____

INDEPENDENT PRACTICE:

Estimate the value of $\sqrt{22}$ to the nearest hundredth.	Estimate the value of $\sqrt{63}$ to the nearest hundredth.
Which is greater, $\sqrt{72}$ or $8.\bar{4}$?	Which is greater, $\sqrt{14}$ or $\frac{15}{4}$?

NAME: _____

Math 7.2, Period _____

Mr. Rogove

Date: _____

ACTIVATING PRIOR KNOWLEDGE:

We can divide fractions using long division:

$\begin{array}{r} \overline{.3636} \quad \frac{4}{11} = 0.\overline{36} \\ 11 \overline{)4.0} \\ \underline{33} \\ 70 \\ \underline{66} \\ 40 \\ \underline{33} \\ 70 \\ \underline{66} \\ 4 \end{array}$	$\frac{5}{12}$ $0.4\overline{16}$
---	--------------------------------------

CLOSURE:

Describe at least three ways to approximate $\sqrt{108}$

or Approximate $\sqrt[3]{25}$

NOTES:

Lesson 11 and 13?

Homework should be lesson 13 Problem set. No calculator PLEASE!!!
